A Luviri Study Series
\$ 20.00 / PB
94gm.

Baptists are keen to go directly to the New Testament in all major issues of faith. If the Bible is the first argument, then history (and therefore tradition) is another line of argument, that both promoters and opponents of women's ordination can and do use. This book is largely concerned with not just the history of women's ordination, or even of Baptists and women's ordination, but offers perspectives from history that may be useful for the discussion of this issue. The thrust of the arguments are aimed at highlighting that differing biblical interpretations are possible, and it must be admitted that Baptists have their own history, over which, much diversity has developed.
