Ebisuote is not a professional work of historiography, a work of scientific research and objectivity. It is a personal account of a joint life experience, emotional, coming from the heart. This brief story of Nigerian Historian Ebiegberi Joe Alagoa and his grandmother Gboribusuote is, therefore, simply a memorial to a shared life, in Nigeria's Niger Delta region.

To define Nigeria is to tell a half-truth. Many have tried, but most have concluded that it is impossible to capture the true scope and significance of Africa's most populous nation through words or images.

And yet here, through personal essays from 24 of its writers, a more accurate picture comes into view: one that details the realities and contradictions of patriotism, examines the role of class and privilege in Nigerian society, juxtaposes inherited tradition with the diasporic experience and explores the power of storytelling and its intrinsic link to Nigeria's history.

Within these pages, acclaimed and award-winning writers share memories and experiences of Nigeria that can be found nowhere else, bringing to the fore a country whose influence can be found everywhere.

Powerful, lyrical and entirely unforgettable, *OF THIS OUR COUNTRY* weaves together a living portrait of Nigeria, one that is as beautiful as it is complex.

The number of interviews in this collection is a record of the various times that readers have taken a break from observing themselves and the societies that Akachi Adimora-Ezeigbo has portrayed. The interviewers are courageous in reversing the mirror and trusting it towards the writer to see herself clearly. In her responses to the various questions put to her, we can say that she self-represents in a way that makes a formal autobiography relatively unnecessary.

The name Gamaliel Onosode, in his lifetime of service to the nation, evoked rectitude: integrity, diligence, humility and creativity. He was a legend of his time and he carried this image with sartorial elegance and simplicity. He was at ease being cosmopolitan, yet also local, deeply committed to the traditions of his native Urhobo land. And not to be forgotten, was his very sweet and engaging smile, in an extraordinary busy life, which all the boardroom politics and all the university intrigues could not efface from his countenance. In his private life, he was distinguished for his religion and commitment to his family. This book, with an illuminating and absorbing narrative, has shed a new light on him in a manner that only a master craftsman, like Femi Osofisan, can. It bares it all in an unusual style, showing who he was as an extraordinary banker, a businessman and a university administrator. There are lessons to be learnt from all that made and strengthened his backbone. To the end, he kept that handsome and charming demeanour. He distinguished himself simply as Mr Onosode.

Before the onset of the self government and independence of the 1950s and 60s, the ruling colonial masters did not have to canvas for votes and make campaign promises. Indeed they expended low budgets on the welfare of Nigerian Peoples. Therefore progressive Nigerian communities through self-help efforts built up their social infrastructures like schools and inter-city roads. This spirit of communities implementing self-help projects spread across the country. At the same time Nigeria-owned businesses were growing alongside foreign companies. We had the Sir Ojukwus, the Odutolas, the Ajanakus, the Dantatas, and the Rabijs. A strong laissez faire and “can-do” spirit was growing in the populace before self-government and Independence.

On October 1, 2020, Nigeria celebrated sixty years as an independent nation. This book reviews the country's evolution since independence. As a well-traveled Nigerian, I have always wondered why a nation so blessed with human and natural resources has failed to reach its enviable height. Over the years, I have seen how gross mismanagement, short-termism, lack of national values, and polarising elements such as tribalism and nepotism have severely held back the country. In this book, I attempt a dissection of the issues.

I started with an inquiry on the state of Nigeria and why the country has failed to rise to its potential. I questioned the poor state of Nigeria's socio-economic status and also its current leaders' lack of ideas. My questions also revolved around the country's low level of revenues, high level of poverty, current addiction to revenues, weak legal and judicial systems. These guided me to an interrogation of the nation's current human development situation through its weak health and education systems.

This book presents an objective but descriptive narrative of the three UPR process, including claims of progress in the promotion and protection of human rights made by the Government of Nigeria and counter claims of human rights gaps by United Nations entities and other civil society stakeholders. Data and facts presented in this book were drawn exclusively from national reports, UN reports and reports submitted to the HRC according to United Nations General Assembly Resolution 60/251.

Hope is simultaneously shattered and kept alive, identities are (trans)formed, and patriotism is (re)defined when the lives of three individuals collide: Okwuchukwu, founder of The Patriots, a syndicate operating outside the law to bring about its own brand of justice to a corrupt nation; Nwakaku, an only child of an impoverished widow who is forced to flee his village to live with an eccentric uncle in the city when The patriots came calling; and Ogbonnaya, a brilliant detective with the Department of State Services, whose mission it is to unmask the individuals behind The Patriots. Can integrity be sustained despite the volatile and nerve-racking situation of the nation? What is one to do when an ideology meant to heal, morphs into a phenomenon that could bring the nation to the brink of anarchy?

Dreams and Assorted Nightmares / Abubakar Adam Ibrahim

Lagos: Masobe, 2020

260p.

9789789796526

\$ 35.00 / PB

254gm.

Zango is a surreal town where men, some with erect manhoods,
die when leaves fall from a life tree.

Zango is both setting and spectre for '*Dreams and Assorted
Nightmares*', a collection of interconnecting short stories which
explore the spaces between life and death and beyond.

There's a poignant story of a special needs boy with prescience;
another about the family of a philandering artist trying to pick

up the pieces after his violent death; one of a teen forced to make a heart-breaking choice after her mother disappears; and another about a woman who reveals a terrible secret to her childhood friend who is in a coma. The characters come richly-layered and memorable — like Naznine who had but slowly lost the most perfect smile in the world; new bride, Nana Aisha, left alone to face armed marauders who invade her home; and brigands, Audu Kore and Maimuna Dajjaj, who share a pure and precious love.

The stories mostly feel mystical and dark, but the palpable compassion with which they are written give them warmth and light. Like rivulets, the stories easily flow into each other, aided by Ibrahim’s signature hypnotic writing and majestic prose. This is a collection to savour especially for its many enigmas — the silent poetry and tragedies of everyday life, the darkness and tenderness of the human mind, and the crossroads between dreams and the supernatural.

The Curse of Happiness / Edify Yakusak

Nigeria: Kurdan Publishing House Limite, 2019

176p.

9789785627985

\$ 20.00 / PB

214gm.

The Curse of Happiness is a collection of short stories that finds ordinary people struggling and sometimes failing in extraordinary circumstances. From a woman faced with a long awaited but ultimately underwhelming miracle in “Baby Blue Joy” to a man who finds himself face to face with humanity’s most terrifying manifestation, an enraged mob, in “What is mine is Yours”. Yakusak stretches the limits of the normal human perception of the decisions people take in situations beyond their control. It’s an in-depth examination into the human psyche that is both intriguing and disturbing on a level that interacts with the inner reaches of our subconscious. The

Curse of Happiness weaves exciting stories of how normalcy is a luxury in reality; one we often take for granted.

A huge chunk of young and middle-aged elites in Nigeria say, “Politics is a dirty game” and, for that reason, have distanced themselves from it. While a significant number of this group of enlightened youths just want to focus on their profession and make a success of their personal lives; some others are passionate about fixing Nigeria but are going about it the wrong way– they have blatantly refused to be partisan, soothing themselves by attempting to transform/influence the system from outside. This book starts out with the concept that transforming Africa, with Nigeria as the focus, starts with young creative, dynamic and upright elites flooding the political space, taking over the structured parties and then dominating the seats of government. But, with the cabal holding tightly to power, how exactly do young elites take over? How would the broke and tactless youth get in the political ring with old, experienced and powerful politicians and win? With a step-by-step guide, the authors present the answers to these questions. In this pleasantly-written manual, you’ll uncover deep and practical political tactics that have been tested and proven by political giants. It is sure to help you gain influence and power within the political space, without having to play dirty.
