The bilingual South African Language Rights Monitor 2009 / Suid-Afrikaanse Taalregtemonitor 2009 is the eighth annual report on the situation pertaining to language rights and language matters in general in South Africa. It cultivates an awareness of language rights and promotes a culture of taking proactive measures in order to oppose violations of language rights. Such awareness could lead, on the one hand, to the further democratisation of the community, and on the other, to increasing participation in public life.

"This interdisciplinary, international, and multi-lingual collection of essays explores a broad range of issues related to hospitality and hostility, in literary and cultural contexts from antiquity to the present. Insightful theoretical and historical discussions undergird richly detailed particular studies. The central focus unifies the diverse pieces, which are original, well-researched and reasoned, and clearly written.

A solid contribution to scholarship in several fields (including linguistics, anthropology and Internet culture), the volume is also enjoyable to read. Its lively and appealing pieces on recent novels and contemporary trends lend a fresh and contemporary feel."

On a spectrum of hostility towards irregular migrants, South Africa ranks on top, Germany in the middle and Canada at the bottom. South African xenophobic violence by impoverished slum dwellers is directed against fellow Africans. Why would a society that liberated itself in the name of human rights turn against people who escaped human rights violations or unlivable conditions at home? What happened to the expected African solidarity? Why do former victims become victimizers? Imagined Liberation asks what xenophobic societies can learn from other immigrant societies which avoided the backlash against multiculturalism in Europe.
