The Great Wall Revisited: From the Jade Gate to Old Dragon's Head / William Lindesay
Beijing: China Intercontinental Press, 2007
291p,; 21 by 29cm
ISBN-13: 9787508510323
\$ 45.00

Using the technique of rephotography – repeat photography at the same place with a time lag in between – this landmark volume, the first mainstream publication on the theme of Great Wall conservation, presents a realistic portrait of the world's most-famous building.

William Lindesay spent three years travelling 35,000 km across North China, carrying his tripod, cameras and a file of vintage photographs, the earliest dating from 1871, looking not merely for vantage points, but 'advantage points', places from and present, side by side.

The Great Wall Revisited presents 72 of the most elucidating 'then' and 'now' comparisons, succinct histories of the sites, and colourful literary impressions left by 'milestone' visitors, juxtaposed beside contemporary eyewitness accounts that explain the changes. This dossier unfolds as an extraordinary journey along the Wall from the Jade Gate in northwest China's gobi to Old Dragon's Head on the Yellow Sea coast.

Chinese Bronzes: A General Introduction
Beijing: Foreign Languages Press, 2007
213p,; 24cm
ISBN-13: 9787119048703
\$ 39.50

Chinese bronzes were not only the daily utensils, work tools and weapons of the people of ancient times, but also exquisite works of master craftsmen which have been handed down from generation to generation. Their beautiful forms, elaborate decorations and the moving stories that were cast on them have attracted the attention and aroused the interest of lovers of bronzes at home and abroad.

This book, copiously illustrated with colour pictures and sketches, is recommended to readers who wish to explore the wonder of Chinese bronzes. In language comprehensible to the layman, it supplies a basic knowledge on Chinese bronze art: its origin, periods of development and its value as regards the study of ancient history and ancient script. The author is a specialist who has personally participated in many major archaeological excavations and researched into this subject for many years, and in this book he reports on the latest results of the study and excavations of Chinese bronzes.

My Way: The Eight Strategies of Air China Towards Success is more than a personal account of Mr Li Jiaxiang's successful role shift from a general of air force to an entrepreneur of a business with assets worth more than RMB 100 billion (approx. US\$13.3 billion). It also charts the journey of Air China moving away from heavy loss towards considerable profit. With no prior experience of managing a business, Mr Li put into practice a marvellous strategic thinking based on his unrivalled courage and extraordinary vision gained from his military career, launching Air China onto the fast track of profit growth and business expansion.

In this book, Mr Li fuses ancient and modern military strategies in his interpretation of corporate management from the perspective of eight topics. They are business starting, positioning, human resource management, brand building, control & management, capital operations, future and successful thinking. Mr Li also examines the world aviation industry in close connection with Air China and predicts the future trends of development.

The phenomenon of South-South FDI flows, particularly those arising from multinational companies from China and India, has generated considerable interest among policymakers, academics and the popular press in recent times. This phenomenon raises several questions such as: What is behind the rise of such intra-regional investment flows? What is the magnitude of such flows, and can they be expected to persist/accelerate over time? What are the challenges faced by emerging market multinationals and the future prospects of intra-Asian FDI flows?

China's publishing industry has experienced vigorous development over the past few years. In 2004, the total publication value (based on list price) exceeded RMB 100 billion in addition to the huge advertising revenue of newspapers and periodicals as well as the value added of printing and other related segments. This has further enhanced the dominant position of publishing within the entire culture industry.

This industry report aims to present the reader with a comprehensive picture of China's publishing industry from 2003 through 2006. It provides accurate, comparable data as well as objective, insightful investigations using proven methods of industrial economics. These data and investigations will offer a significant guide for China's planning and development of its publishing industry in the 21st century.

Journey into China

\$ 19.95

The charms of China, to many foreigners, lie in its rich traditional cultures, ethnic customs, and how they are merged into the modernization process. In consideration of its rich history, city planners have to ensure that the traditional and ancient elements of the city will not be eroded. As a result, the environment and the layout of the city frequently embody both the modern and the ancient elements. A number of cities, such as Lhasa, Lijiang and Beijing, have strong historical and cultural affiliation hence they became cultural symbols of the country. And with their rich cultural heritages, each unique in its own way, these Chinese cities present a more exciting scenario for one to fully appreciate them.

Beijing was historically known as Peking. As the capital city for both the Ming and Qing dynasties, Peking witnessed both cultural exchanges and diplomatic confrontation between East and West over a period of three hundred years. The history of this period was recorded in many books published in Europe, which also included interesting images of old Peking. This book is the first attempt of its kind to present the best European illustrations of Peking in one volume. From the earliest visit of the East India Company's delegation to the Qing's court in the middle of 17th century, to the decline of China's last

imperial dynasty in the early 20th century, from imperial court ceremonies to the life of ordinary Pekingnese, from the historical heritage of Chinese architecture to the impact of European influence, this book provides us with a rich tapestry of Peking's social and architectural history. The majority of the pictures here will be new to modern readers. These images together with the accompanying text bring the old imperial city vividly to life.

This book is a magic wand that helps you understand Chinese history with ease, as well as a window providing a convenient view on China.

It tells nearly 100 well-known stories from remote antiquity to the Revolution of 1911 in time sequence and takes key historical events and figures as the main line. We have strived to present the social changes, wars and battles, and culture and art in a series of accurate, vivid and concise stories. The book is a historical documentary with varied extraordinary splendour rather than a heavy, dull academic work.
