After missing several deadlines and overcoming almost a decade of political differences, Goods and Services Tax (GST) in India was finally rolled out on July 1, 2017. Undoubtedly, GST represents the biggest tax reform in the fiscal history of India. The pre-GST system of indirect taxes was marked by multiplicity of taxes and rates at the Central and state levels which resulted in a complex tax structure ridden with hidden costs for trade and industry.

The pre-Moghul Muslim presence in the sub-continent is very important from many angles. In this phase the basic structure of an efficient administration evolved and from this point of view Alauddin Khilji holds a cardinal importance. Literature and learning, art and architecture and public morality reached a new peak. It is a deplorable irony of time that we do not possess an accurate and detailed historical record of the achievements of such a great ruler. Sultan Ala-ud-Din has not been dealt fairly by the historians for one reason or the other. It was necessary to present this great Sultan in his true colours.

Jahangir

kept up to the scene as the Ruling Soul for a long duration of twenty-two years. The incentive of carrying on his memoirs ended in the seventeenth year of his rule due to breakdown in his health after which they were continued by Mu'tamad Khan till the 19th year of Jahangir's power, under his pseudo name.

Literary theory with an intellectual ancestry of over 2300 years is a highly complex and fascinating discipline. It is highly inter-disciplinary and intellectually very demanding to comprehend. Literary theory, from Aristotle (Classicism) to Alan Sinfield (Cultural Materialism) in the last decade of the twentieth century, is an unmanageably vast area for both our undergraduate and postgraduate students. The primary aim of writing this book is to simplify an essentially complex subject for the average college student in India. It is meant for the non-specialist in the field. Many difficult concepts have been explained in a manner that is easy to understand by the readers. In order to enable college students to get a complete grasp of theory, the basic terms and concepts are presented with great clarity.

Since Simone de Beauvoir first proclaimed that 'One is not born a woman, one becomes one', the study of gender has become one of the most significant new disciplines in the humanities and social sciences. Enriching our knowledge of the representations that inform our understanding of masculinity, femininity and queerity, "Rethinking Gender: Masculinity, Femininity and Queerity in Postcolonial Indian Fiction" examines, amongst other things, the meaning and relevance of gender on various levels. This book will attempt to establish a central argument that will enable readers to see an emerging pattern in which issues of femininity, masculinity, and conflicting sexualities could be examined, thus, providing a multi-faceted approach to the central question of the way in which gender is being represented in literary works of the Indian novelists. This multilayered book, lucidly written and theoretically exhilarating, will be an invaluable addition to students and academics in gender studies, literature, cultural studies, and a range of other disciplines.

The Shadow Lines is a highly innovative, complex and celebrated novel of Amitav Ghosh. Published in 1988, it received the prestigious Sahitya Academy Award in the following year. Not only literary critics but also some noted litterateurs have acclaimed it for what it has been able to achieve as a work of art. Its focus is a fact of history, the post-partition scenario of violence; but its overall form is a subtle interweaving of fact, fiction and reminiscence. It is a novel in which Amitav Ghosh has been able to realise his artistic conception through an art form, which is cohesive. However, it remains somewhat inaccessible to some readers; they are, particularly, mystified by its non-linear mode.

The most important concern of feminist agenda is that women should be 'visible' and their voices must be 'audible' in the society, and this concern gets a proper place in Shashi Deshpande's fictional works as she raises the issues of women's inner struggle to revolt against emotional slavery. Loneliness that dwells in a feminine heart has occupied a centre stage among current burning gender issues. The novelist shows that in spite of being surrounded by father, brothers, husband and children, a woman feels lonely and is unable to give expression to her feelings.

Multiculturalism can be defined as a body of thought in political philosophy about the proper way to respond to cultural and religious diversity. It encompasses equal respect to

the various cultures in a society, promotion of the maintenance of cultural diversity, and is characterised by preservation of the distinctiveness of multiple cultures that co-exist in the same society. Culturally, linguistically, religiously and ethnically, India is one of the most diverse countries in the world. Its long history, unique geography and diverse demography have shaped its culture. Its languages, literature, religions, dance, music, art, architecture and customs differ from place to place within the country, but still possess a commonality. India's culture is an amalgamation of many diverse sub-cultures spread all over the subcontinent.

The present book seeks to study the feminist perspective in Shashi Deshpande's novels. It reveals Deshpande's sincerity and ability in voicing the concerns of the urban educated middle-class woman. Trapped between tradition and modernity, her sensitive heroines are fully conscious of being victims of gross gender discrimination prevalent in a conservative male-dominated society. A culture-specific approach has been adopted to unravel Shashi Deshpande's pragmatic resolution related to the modern Indian woman's beleaguered existence. The book, it is hoped, will make a rich contribution to women's studies.

The 2006 Man Booker Prize winner Kiran Desai, for her novel, *The Inheritance of Loss*, and the recipient of 2000 Pulitzer Prize for Fiction, Jhumpa Lahiri, are two post-colonial immigrant migration writers whose writings are fabulously rich in conflict of class and culture. Jhumpa Lahiri's debut short story collection, *Interpreter of Maladies* took the literary world by storm and won her accolades from the critics. It was followed by her bestselling first novel, *The Namesake*, a finely wrought, deeply moving family drama that illustrates her signature themes; the immigrant experience, the clash of culture, and the tangled ties between the generations.

The present book provides a critical analysis of all the novels and short stories of Ernest Hemingway, a twentieth century American novelist who got Nobel Prize for Literature. Hemingway is a writer of lost generation, of an era of chaos and disillusionment, but his approach is neither defeatist nor negative in nature; instead, it is something vigorously optimistic and positive in spirit. What Hemingway seeks to tell us through his novels and short stories is indeed important, but far more important is the way, the mode in which he tells us. It is in this course that a proper emphasis has been given in the present book on the use of symbols and images in his novels and short stories besides other trends and techniques in his writings. Undoubtedly this book will be a boon for the scholars of Ernest Hemingway.
