[ Society, Economics, and Politics in Pre-Angkor Cambodia presents a study of those topics based on a close reading and analysis of the contemporary Khmer-language inscriptions of the 7<sup>th</sup>-8<sup>th</sup> Centuries. It thus breaks with the Sanskrit and Indological tradition which has dominated work on early Cambodia, giving prominence to royal genealogies and religion.

In addition to making available the neglected information in the Khmer corpus, the author tries to present early historical Cambodia in a form which is comparable with what is known of early societies and states in other parts of the world, and in a way which may be of interest to social scientists as well as to Orientalist historians.

New explanations are also proposed for some of the problems which have long troubled students of early Cambodia – the transition from Funan to Chenla, the formation of the first royalty and first states, the nature of Cambodian “slavery”, the puzzle of the poorly documented 8<sup>th</sup> century, which is presented here as a period of consolidation rather than disintegration, and the political – demographic shift from South to North which resulted in the founding of Angkor.]

Cambodia's Foreign Policy and ASEAN : From Nonalignment to Engagement / Kao Kim Hourn

Cambodia : Cambodian Institute for Cooperation and Peace, c2002

xviii, 562 p.; 21cm.

Includes Bibliography

\$ 39.50

[This book studies Cambodian foreign policy from 1967 to 1999, with the emphasis on its policy toward ASEAN, relying on primary sources. The study provides a window into foreign policy decisions in Cambodia.

While there are different approaches to the study of foreign policy, this book applied the "Rational Actor Model" as the most appropriate approach in explaining Cambodian foreign policy broadly and Cambodian policy toward Asean more specifically. In order to apply this model, this book identified five key parameters of Cambodian foreign policy –strategic approach, economic approach, diplomatic approach, prestige approach, and legitimacy approach.]
