[Society, Economics, and Politics in Pre-Angkor Cambodia presents a study of those topics based on a close reading and analysis of the contemporary Khmer-language inscriptions of the 7th-8th Centuries. It thus breaks with the Sanskrit and Indological tradition which has dominated work on early Cambodia, giving prominence to royal genealogies and religion.

In addition to making available the neglected information in the Khmer corpus, the author tries to present early historical Cambodia in a form which is comparable with what is known of early societies and states in other parts of the world, and in a way which may be of interest to social scientists as well as to Orientalist historians.

New explanations are also proposed for some of the problems which have long troubled students of early Cambodia – the transition from Funan to Chenla, the formation of the first royalty and first states, the nature of Cambodian “slavery”, the puzzle of the poorly documented 8th century, which is presented here as a period of consolidation rather than disintegration, and the political – demographic shift from South to North which resulted in the founding of Angkor.]

[This book, the only illustrated publication in English language on the Royal House of Cambodia, is the result of several years of meticulous research, providing a wealth of information on the past monarchs of Cambodia and their descendants, as well as on the current Royal Family.

Rare royal portraits, covering a period of over 100 years, have been assembled in order to make this book an invaluable source of reference and information on the Royal House of Cambodia.

Researched and written with the cooperation of the members of the Royal family of Cambodia, this unique publication accompanies the celebration of His majesty king Norodom Sihanouk's 80th birthday anniversary and the 62nd anniversary of his ascension to the throne in 1941.]
