Gender, Ritual and Social Formation in West Papua: A Configurational Analysis Comparing Kamoro and Asmat / Jan Pouwer

Netherlands: KITLV Press, 2010

x. 300p. ; 24cm.

ISBN-13: 9789067183253

\$ 60.00

This study, based on a lifelong involvement with New Guinea, compares the culture of the Kamoro (18,000 people) with that of their eastern neighbours, the Asmat (40,000, both living on the south coast of West Papua, Indonesia). The comparison, showing substantial differences as well as striking similarities, contributes to a deeper understanding of both cultures.

Part I looks at Kamoro society and culture through the window of its ritual cycle, framed by gender. Part II widens the view, offering in a comparative fashion a more detailed analysis of the socio-political and cosmo-mythological setting of the Kamoro and the Asmat rituals. These are closely linked with their social formations: matrilineally oriented for the Kamoro, patrilineally for the Asmat.

Next is a systematic comparison of the rituals. Kamoro culture revolves around cosmological connections, ritual and play, whereas the Asmat central focus is on warfare and headhunting. Because of this difference in cultural orientation, similar, even identical, ritual acts and myths differ in meaning. The comparison includes a cross-cultural, structural analysis of relevant myths.

## **Economics/Development Studies**

Accounting for Services: The Economic Development of the Indonesian Service Sector, ca.  
1900-2000 / Daan Marks

Amsterdam, Netherlands: Aksant Academic Publishers, 2009

334p. ; 24cm.

ISBN-13: 9789052603360

\$ 57.00

The most intriguing question about Indonesia's economic development during the twentieth century is why the country's growth performance has been so erratic and displayed such a high degree of discontinuity. This is connected with the fundamental question about the nature of long-run economic development in Indonesia. So far the economic historiography of Indonesia has been less systematic than what the available source material would permit. Indonesia is exceptionally well endowed with rich statistical sources, which carry the potential of supporting a rigorous and systematic quantitative approach to vital questions concerning the economic growth performance in the long run. This book takes such an approach and presents new estimates for the long-run growth of the Indonesian service sector, and analyses the role of the various service sectors in economic development. Linking empirical and theoretical analysis in a creative fashion, Daan Marks provides a rich and original contribution to our understanding of the economic history of Indonesia. He shows that the service sector has played a crucial role in Indonesia's economic development. Or in other words, to fully understand Indonesia's economic development path services need to be accounted for.

## **Politics**

Political Reform in Indonesia After Soeharto / Harold Crouch

Singapore: ISEAS Publishing, 2010

xi. 390p. ; 23cm.

ISBN-13: 9789812309204

1. Indonesia – Politics and government – 1998-  
\$ 39.90

Three decades of authoritarian rule in Indonesia came to a sudden end in 1998. The collapse of the Soeharto regime was accompanied by massive economic decline, widespread rioting, communal conflict, and fears that the nation was approaching the brink of disintegration. Although the fall of Soeharto opened the way towards democratization, conditions were by no means propitious for political reform. This book asks how political reform could proceed despite such unpromising circumstances. It examines electoral and constitutional reform, the decentralization of a highly centralized regime, the gradual but incomplete withdrawal of the military from its deep political involvement, the launching of an anti-corruption campaign, and the achievement of peace in two provinces that had been devastated by communal violence and regional rebellion.

Alternately lauded as a democratic success story and decried as a flawed democracy, Indonesia deserves serious consideration by anyone concerned with the global state of democracy. Yet, more than ten years after the collapse of the authoritarian Suharto regime, we still know little about how the key institutions of Indonesian democracy actually function.

This book, written by leading democracy experts and scholars of Indonesia, presents a sorely needed study of the inner workings of Indonesia's political system, and its interactions with society. Combining careful case studies with an eye to the big picture, it is an indispensable guide to democratic Indonesia, its achievements, shortcomings and continuing challenges.

Building-Democracy on the Sand: Advances and Setbacks in Indonesia / Willy Purna Samadhi & Nicholaas Warouw (Editors)  
Indonesia: PCD Press & DEMOS, 2009  
xi. 291p. ; 21cm.  
ISBN-13: 9789791704915  
\$ 35.90

It is true that most political actors in Indonesia have adjusted to the existing rules and regulations within the procedures of democracy. But giving priority to the outcome and general habits (culture) is to neglect that the democratic infrastructure is far from sufficient. The alternative actors in particular are short of capacity to use and promote the means of democracy. Organised democracy and especially the system of representation is monopolised by the powerful elite. This collected essays, based on survey of democracy, suggests that Indonesia's democracy is held back. It is true that all people are allowed to vote, but women (who are not well connected), the poor and subordinated people are de-facto prevented from standing as candidates and sometimes even from voting, thus from trying to develop popular representation. Basic issues of equal civic rights and political equality thus present a similar challenges but also an opportunity as did the movements for the right to vote in the old democracies. Hence, the immediate need to develop well-organised and non-party-dominated political blocs - among others, is to foster independent popular influence within organised politics; to alter the current relations of power through more popular representation and participation; and to increase bargaining power to foster compromises that move towards rights-based sustainable development.

From Monologue to Dialogue: Radio and Reform in Indonesia / Edwin Jurriens  
Netherlands: KITLV Press, 2009  
190p. ; 24cm.  
ISBN-13: 9789067183543  
\$ 42.00

*From monologue to dialogue: Radio and reform in Indonesia* analyses how radio journalism since the late 1990s has been shaped by and contributed to Reformasi, or the ambition of democratizing Indonesian politics, economy and society. The book examines ideas and practices such as independent journalism, peace journalism, meta-journalism, virtual interactivity, talk-back radio and community radio, which have all been designed to renew audience interest in media and societal affairs. It pays special attention to radio programmes that enable hosts, experts, listeners and other participants to discuss and negotiate the very rules and boundaries of Indonesias newly acquired media freedom. The author argues that these contemporary programmes provide dialogic alternatives to the official New Order discourse dominated by monologism.
