\$ 49.90 / HB

This book presents a detailed account of the development of strong and substantive economic relations that existed between Singapore and China since the time when the two countries established diplomatic ties in October 1990. The chapters provide a comprehensive discussion of the main areas of cooperation, such as the institutional framework for pursuing economic links, the Suzhou Industrial Park, the Sino-Singapore Tianjin Eco-City, investments, trade, finance, tourism and education. The economic opportunities and challenges in these economic sectors in the two countries are examined in the context of the profound political and social changes taking place in mainland China and the globalization of the world economy. The book will be invaluable to policy-makers, academics and students specializing in Chinese studies, as well as businessmen and

the general public interested in seeking a greater understanding of the complex economic relations between the two nations.

ISEAS Perspective: Selections 2012-2013 / edited by Ooi Kee Beng

\$ 24.90/PB

“The Institute of Southeast Asian Studies (ISEAS) launched its electronic publication ISEAS Perspective in mid-2012. During its first year in existence, 58 internally reviewed issues were produced. These were distributed in steady fashion by email to addresses registered with the Institute. However, ISEAS has deemed it a worthy public service to have selected articles from that first year published in a single printed volume at cost price. This is the book that you now hold in your hand. Articles herein were chosen according to strict criteria such as analytical strength; continued salience of the subject discussed; referential potential; literary quality in general; et cetera. ISEAS intends to print such annual selections in the coming years. We are certain that you, the reader, will find them informative and stimulating.” – Tan Chin Tiong, ISEAS Director
