Since the first edition, Indonesia has undergone massive political and legal change as part of its post-Soeharto reform process and its dramatic transition to democracy. This work contains 25 new chapters and the 4 surviving chapters have all been revised, where necessary. Indonesia: Law and Society now covers a broad range of legal fields and includes both historical and very up-to-date analyses and views on Indonesian legal issues. It includes work by leading scholars from a wide range of countries. There is still no comparable, English language text in existence.

The creation of a national school of Islamic law in Indonesia has been on the legal agenda for the past fifty years. This book is a summary of what has been achieved. The material shows us a complex range of references for syariah. These include the formal structures of a "new fiqh", philosophies of law, transmissions of syariah through tertiary curricula and the Friday sermon in mosques, a bureaucratic form for conducting the Hajj, and contemporary debates on syariah values as expressions of public morality. Together these references indicate just how elusive the meaning of syariah has become in contemporary Indonesia.
