Bushveld – Ecology and Management / P.T. van der Walt

Pretoria, South Africa : Briza Publications, 2010

160p.;

ISBN 9781875093946

\$ 36.50

17 of the country's most prominent bush experts share their knowledge about conservation and management of the Bushveld, its geology and soil, veld and plants, timber and age-old trees, survival and usage of the veld in historical times, modern-day

tourism and how one goes about buying a farm here.

In popular parlance, 'bush' refers to a woodiness that differs in composition, density and height. It is a place where the life cycles of some 5 700 plant species contribute to the pulsing rhythm and dynamics of sweet, sour, mixed or arid Bushveld. One and a half million visitors find enormous pleasure in this precious biotreasure every year, but it is deteriorating fast as a result of human activities and mismanagement. Its use should be approached with much more sensitivity and proficiency. To give more impetus to this ideal, 17 of the most prominent bush experts of the country share their knowledge in a clear and colourful way – wonderful reading matter for the conservator, farmer, student and every lover of the bush.

RAPTOR SURVEY AND MONITORING – a field guide for African birds of prey / Gerard Malan

Pretoria, South Africa : Briza Publications, 2010

192p.;

ISBN 9781920146030

\$ 38.50

This book intends to enable anyone with an interest in birds of prey with the skills and tools required to become involved and participate in raptor research. Whether for management or pure academic purposes, or the satisfaction of knowing, it is important for would-be raptor surveyors and monitors to adhere to the same, tested and accepted methods

Problem Plants and Alien Weeds of South Africa / Clive Bromilow

Pretoria, South Africa : Briza Publications, 2010

424p.;

ISBN 9781920217303

\$ 49.50

First published in 1995 and revised in 2010 as Problem Plants and Alien Weeds of South Africa, this book became an indispensable guide for anyone interested in knowing how to recognise, understand and control troublesome plants.

- The book covers more than 500 species of problem plants in detail, with descriptive and interesting text, highlighting the origin and environmental impact of each species as well as methods of control.
- There are over 700 colour photographs to assist with identification and to illustrate the problematic nature of the plants.
- Up-to-date distribution maps show the range of each plant, while a series of icons offers an easy overview of the pest status of a plant and how it is covered by government regulations, herbicide registration and biological control.
- Introductory chapters explain aspects of undesirable vegetation such as bush encroachment and veld degradation, as well as chemical and biological control techniques and the threat posed by ornamental garden plants.
- An innovative 'identification key' helps even the non-botanist to find and identify a particular species.

Caves of the Ape-Men: South Africa's Cradle of Humankind World Heritage Site / Ronald J Clarke and Timothy C Partridge

Johannesburg, South Africa : WITS University Press, 2010  
160p.; 257 x 307 mm.  
ISBN 9781868145102  
\$ 65.00

Wits University Press presents its latest publication, entitled Caves of the Ape-Men. The unique fossils featured in this book were excavated from caves which today are clustered within the UNESCO World Heritage Site known as the Cradle of Humankind. This is the first ever profusely illustrated hardback coffee table book dealing with Sterkfontein, Swartkrans and environs in an easy to follow and entertaining style. The fact that it was written by three people, Ronald J. Clarke, Timothy C. Partridge and Kathleen Kuman, who have worked extensively on these sites and their contents over many years, ensures the authenticity of the information provided on fossils, geology and archaeology.
