Rizal: His Legacy to Philippine Society was born out of the authors' collective experience in teaching Rizal in the academe. It is delightful to know and write the biography of such an exceptional man. His life has been highly documented of all heroes in Asia. Most of his essays and poems were dedicated to the Filipino youth, and so the authors hope that college students of today will be able to emulate our National Hero – his character particularly his respect and love for his parents, his compassion, moral excellence, unparalleled leadership, and his deep love of country.

International Education and the Chinese Learner is one of the first full-length studies in

the relatively new field of transnational pedagogy to explore the role of the Chinese learner in international schools and universities across the globe. It describes the unprecedented growth of international schools and university exchange programs during the past decade together with the way in which Chinese learners at all levels have taken advantage of these opportunities and have been scrutinized in the process. The results of this internationalization have in some cases solidified stereotypes about Chinese learners and in other instances have helped to overcome those prejudices.
