Exotic Medicinal Plants in Sri Lanka and Their Uses Volume 1 / Ranil Senanayake
Sri Lanka: Ranil Senanayake, 2010
154p. ; 15 x 21cm.
ISBN-13: 9789558505045
\$ 26.00

Featuring 49 medicinal herbs, this book is a part of a global movement to share and synthesize traditional healing knowledge. It seeks to reveal the medicinal value of plants that inhabit Sri Lanka's landscapes, but originate from other countries. Although these plants have often been seen as weeds, their special properties add strength to our system of indigenous medicine.

Private Lives: An Expose of Singapore's Freshwaters / Darren C. J. Yeo, Wang Luan Keng & Kelvin K. P. Lim (Editors)
Singapore: The Raffles Museum of Biodiversity Research, Faculty of Science, National University of Singapore, 2010

258p. ; 21cm.
ISBN-13: 9789810864484
\$ 22.00

The freshwater realm in Singapore is surprising rich; despite the small size of the island, over a century of human impacts and a host of other problems. While clean drinking water is an important national concern; the stream, swamps, waterways and reservoirs in Singapore nevertheless also contain many native species of plants and animals that represent the original natural heritage of the island. In the third part of this series, the "Private Lives" of the denizens of Singapore's waterways – both native and non-native, are examined; and the many challenges facing this key ecosystem are discussed.
