As a special administrative region of China, Hong Kong has its own legal system rooted in the common law. Reforms to this system take into account Hong Kong's unique conditions as an international city and draw widely on practices around the world. Since 1980, recommendations from a Law Reform Commission, chaired by the Secretary for Justice, have resulted in comprehensive revisions in key areas of law, ranging from commercial arbitration and interception of communications to divorce and copyright.

Recently, however, the government has been slow to act on the Commission's recommendations. Questions have also arisen about whether the Commission — under-resourced, part-time and government-led — can really meet the needs of an increasingly sophisticated society. Is law reform itself also in need of reform? This collection of essays by distinguished experts from around the world seeks answers to the question. The book explores the varied experience of law reform in Hong Kong and other common law jurisdictions and makes recommendations for strengthening the process of law reform both in Hong Kong and elsewhere.

China has granted Hong Kong a high degree of autonomy through the Basic Law under the principle of "one country, two systems". Hong Kong's legal system under the Basic Law is based on the common law and is administered by independent courts. By interpreting the Basic Law, Hong Kong's courts have reviewed legislation and executive decisions, and have achieved a "second founding" of the Basic Law as an enforceable constitution. This book is the first comprehensive account of how the Hong Kong courts gained this vital power of judicial review. Through an analysis of important court cases since 1997, the book also examines how the Hong Kong courts maintain their relationships with the executive and legislature, and with China's Central Authorities, which have been sceptical of these achievements. Hong Kong's unique status as a common law jurisdiction within socialist China poses risks of integration: this book concludes that the best choice lies in maintaining and developing a cosmopolitan judicial outlook.
