Among the Burmese in 1902. French Impressions of a Buddhist Country documents the travels of a Frenchman, member of the Académie française, undertaking a journey towards understanding the religions and customs of the peoples of the Indian Empire. This book gives an overview of his thoughts on the religious groups he meets in Burma. First he travels in Rangoon, where he visits various temples and areas of the city, then in Mandalay and further northwards on the Irrawaddy. His critical impressions are described in an unusual, impressionistic style without losing empathy for the plight of the ordinary Burmese. His insights also deal on a fundamental level of philosophical and religious inquiry with the influences exerted by western colonization, by the energetic onslaught of Chinese and Indian traders and a budding materialism among the Burmese. This is an unusual description by an unusually sensitive author.

A French Engineer in Burma and Siam (1880), With a Discussion on the Kra Canal Controversy contains a number of discussions on all that a French engineer, hired by the English in Burma, met with during his stay. He was a municipal engineer in Bassein to deal with the aftermath of an earthquake, an engineer undertaking the construction of a telegraphic line between Siam and Burma, a political commentator on the Kra Canal on the Malay Peninsula and an engineer in charge of mines in English Burma. He was also a keen observer of what the English had been achieving or not in Burma just before they staged a Third War in Burma. Chapters on history—of a politically tainted, pro-French variety—offer a sound perspective on the colonial politics of the time. Where he was residing and travelling he was also a keen observer of local customs so different and new for a European in the Far East. The author describes the high status of women in Burma and marriage customs too. The ethnic groups of Burma are especially in his focus. Of special interest too are his observations on work and travel in Burmese jungles and the prevalence of large animals such as tigers, leopards and panthers, the hunting of which was necessary to protect workers. After King Thibaw had been deposed he was eager to revise the first editions of his book, playing in the period 1880-81, with new material and political commentary. In this discussion the role of Siam and the great valley of the Chao Phraya or Menam River as a route to Yunnan, figure prominently. For the third revised and expanded edition, which is presented here, he also updated the discussion on how best to realize the shortcut offered by the narrowness of the Kra Isthmus. A project he presented to King Chulalongkorn. F. de Lesseps, of Suez Canal fame, worked on the pilot study contained in this book

Celebrated as a trading port, Hong Kong was also Britain's "eastern fortress". Likened by many to Gibraltar and Malta, the colony was a vital but vulnerable link in imperial strategy, exposed to a succession of enemies in a turbulent age and a troubled region. This book examines Hong Kong's developing role in the Victorian imperial defence system, the emerging challenges from Russia, France, the United States, Germany, Japan and other powers, and preparations in the years leading up to the Second World War. A detailed chapter offers new interpretations of the Battle of Hong Kong of 1941, when the colony succumbed to the Japanese invasion. The remaining chapters discuss Hong Kong's changing strategic role during the Cold War and the winding down of the military presence. The book not only focuses on policies and events, but also explores the social life of the garrison in Hong Kong, the struggles between military and civil authorities, and relations between the armed forces and civilians in Hong Kong.

Drawing on original research in archives around the world, including English, Japanese, and Chinese sources, this is the first full-length study of the defence of Hong Kong from the beginning of the colonial period to the end of British military interests East of Suez in 1970. Illustrated with images and detailed maps, Eastern Fortress will be of interest to both students of history and general readers.

Reformer, intellectual, colonial governor, Sir John Bowring (1792–1872) was the archetype of the ambitious men who made Britain the leading global power in the 19th century. Born to a modest trading family, he showed an aptitude for languages which led him to literature, then to radical politics in the struggles for liberty in France, Spain and Greece. Taken up by the philosopher Jeremy Bentham, he became a figure in the literary world. But his emphasis was on action rather than theories. He became a high-profile advocate of free trade and a liberal foe of Karl Marx. As member of parliament he supported full suffrage and other radical causes. He modernized Britain's public accounts, invented the florin as a first step to decimalization, and became an industrial entrepreneur. Losing his money in the 1848 slump, he took a job as consul in Canton, which led to the governorship of Hong Kong. As Britain's plenipotentiary in East Asia he negotiated a key treaty with King Mongkut of Siam but also started a war with China. His term as Governor of Hong Kong (1854–59) was plagued with problems. But there as elsewhere he left a legacy of liberal ideas.

Bowring's impact was spread over so many fields that his name has been eclipsed by those with a narrower focus. This book brings his life and disparate achievements together, with a particular emphasis on his role in promoting free trade and his much criticized career in Asia.

Toward the end of the eighteenth century, the scholar and wit Ji Xiaolan published five collections of anecdotes and discourses on the interaction between the mundane and the spirit worlds, incorporating earthly life stories and happenings. Containing Ji's thoughts and others' experiences, these tales concern peasants, servants, merchants, governors, and ministers; take place throughout the Qing empire; and recount comedy and tragedy, cruelty and kindness, corruption and integrity, and erudition and ignorance. Some stories use ghosts to satirize men and manners; others straightforwardly examine beliefs and practices. Altogether, they draw a portrait of the time unmatched in scope and variety. Selections are organized thematically and include a contextualizing preface. An introduction appraises Ji's own career and the atmosphere in which he lived.
