Bodies in China: Philosophy, Aesthetics, Gender and Politics / Eva Kit Wah Man

Bodies in China uses Chinese philosophy to reframe Western scholarship on gender, body, and aesthetics. Does Confucianism rule out the capacity of women as moral subjects and hence as aesthetic subjects? Do forms of Chinese philosophy contribute or correspond to patriarchal Confucian culture? Can Chinese philosophy provide alternative perspectives for Western feminist scholars? The first section considers theoretical and philosophical discussions of Western traditions and how the ideas offered by Confucians and Daoists can provide alternative body ontologies for critical feminist practices. The second section reviews female aesthetical representations ranging from The Book of Songs to the work of the controversial body artist He Chengyao. The third section traces changing perceptions of femininity from imperial to its current cosmopolitan era using a range of case studies including Ming dynasty literature, Hong Kong women's fashion in the 1960s, and the 2008 Summer Olympics in Beijing. Overall, this book discusses new conceptual models that feminist scholars are using to displace dualism and emancipate notions of the body from Cartesian models and metaphors.

1. Yudhoyono, Susilo Bambang, 1949-
2. Indonesia – Politics and Government – 21st Century
3. Indonesia – History -21st Century

The Loner tells the story of President's Yudhoyono's decade in power, describing in detail the many challenges he faced and why Indonesia is still struggling with its past.

- The first comprehensive review of President Yudhoyono's decade in power.
- Why a leader of Yudhoyono's abilities failed to fulfill his undoubted promise.
- A description of Indonesia's emergence from the 1997–98 financial crisis and the many missed opportunities that came with the 2004–2012 commodity boom.

The Loner is not only a warts-and-all assessment of President Susilo Bambang Yudhoyono's legacy as Indonesia's sixth and first directly-elected president, but also reflects on the many interesting issues of his decade in power which did not receive the sustained media attention they deserved. In this regard, it is as much a record of those years as it is of Yudhoyono's leadership itself, covering everything from natural disasters and fuel subsidies to terrorism, corruption, resource nationalism and a bank scandal that, for many people, marked a significant turning point in the retired general's once-promising presidency.

INDIA RISING tries to chronicle that India, alongside its convulsions. It is a collection of anecdotes and observations of the significant events that marked the decade of Congress Party rule under Manmohan Singh, culminating in the rise of Modi... It is built around the access the writer enjoyed with some of the key decision-makers of the time. It is targeted at the person who has a general idea of India, and perhaps is curious to know more. The reader is invited to begin anywhere, because the chapters are very nearly self-contained – like the traditional Indian village community that only needed to reach out of its territory for salt and matrimonial alliances.

Ties That Bind : Race and the Politics of Friendship in South Africa / (Eds)

What does friendship have to do with racial difference, settler colonialism and post-apartheid South Africa? While histories of apartheid and colonialism in South Africa have often focused on the ideologies of segregation and white supremacy, Ties that Bind explores how the intimacies of friendship create vital spaces for practices of power and resistance. Combining interviews, history poetry, visual arts, memoir and academic essay, the collection keeps alive the promise of friendship and its possibilities while investigating how affective relations are essential to the social reproduction of power. From the intimacy of personal relationships to the organising ideology of liberal colonial governance, the contributors explore the intersection of race and friendship from a kaleidoscope of viewpoints and scales. Insisting on a timeline that originates in settler colonialism, Ties that Bind uncovers the implication of anti-Blackness within nonracialism, and powerfully challenges a simple reading of the Mandela moment and the rainbow nation. In the wake of countrywide student protests calling for decolonization of the university, and reignited debates around racial inequality, this timely volume insists that the history of South African politics has always already been about friendship. Written in an accessible and engaging style, Ties that Bind will interest a wide audience of scholars, students, and activists, as well as general readers curious about contemporary South African debates around race and intimacy.

This book argues that Africa is in a mess due to African people's imprudent and misguided actions at the macro, meso and micro levels in all African countries. The book's contention is that even though Africa's problems emanate from slavery and colonialism, most of them, are actually man-made, that is, created by Africans themselves

South Africa has been in the grip of the 'Zunami' since May 2009: Scandal, corruption and allegations of state capture have become synonymous with the Zuma era, leaving the country and its people disheartened. But Jacob Zuma's time is running out. What impact will his departure have on South Africa, its people and on the ruling party? Can we fix the damage, and how? Ralph Mathekga answers these questions and more as he puts Zuma's leadership, and what will come after, in the spotlight

This book studies China's Belt and Road Initiatives and the country's neighboring diplomacy. The Belt and Road Initiatives proposed by Chinese President Xi Jinping in 2013 consist of two main components, the land-based "Silk Road Economic Belt" and ocean-going "Maritime Silk Road". China has implemented the initiatives by establishing Asian Infrastructure Investment Bank and Silk Road Fund. This book focuses on analysis of the initiatives and the responses from the major powers, neighboring countries and regions.

The book consists of four parts: the Overview; The Belt and Road Initiatives and Big Powers; The Belt and Road Initiative and Regions; The Belt and Road Initiative and Hot Issues. The Overview explicates the strategic orientations, connotations and approaches of implementation of the initiatives from a theoretical perspective. The second part analyzes the Asia-Pacific strategies of four great powers, namely the United States, Russia, Japan and India, their relations with China and responses to the initiative. The third part discusses the Belt and Road Initiatives and four regions, namely Northeast Asia, Southeast Asia, South Asia, and Central Asia. It evaluates their attitudes and responses towards the Belt and Road Initiatives, strategic docking and major challenges in this regard. The fourth part touches upon the initiatives and current hot issues including non-traditional security, the South China Sea dispute, and venture analysis on investment environment renovation.

Since the great financial crisis in 2008, the Group 20 (G20) has played an increasingly important role in global economic governance as an emerging global macroeconomic coordination mechanism. China and the Group 20 provides experts' observations on the development of the G20, G20's influence on global economic governance and China's role in this emerging institution. The first part of the book analyses important policy issues facing the G20 and global economic governance including the G20's role in strengthening and promoting global macroeconomic coordination; reform of the international financial system; the stability and effectiveness of the international monetary system; the integration of international trade and investment regimes; the new agenda of international development and the complex relations among the major powers. The second part focuses on China's relations with the United States, the EU, and the other BRICS countries, and their implications to the G20's development. China, as the largest developing country and the second largest economy, has the responsibility to safeguard the general interests of developing countries on one hand, and to cooperate with the developed countries to create an equal and open economic environment on the other hand. The book chapters are contributed by experts from the main member countries of the G20.

Is China an Empire? / Han Shih Toh

\$ 90.00 / HB

With the rapid increase in China's overseas investment and trade, China's global economic clout is increasing by the day. Does China's global economic reach make it an empire in the 21st century? What sort of impact will China's trade and investment have on its global counterparts? Chinese investment projects around the world, from railways in Africa and dams in Latin America to the acquisition of landmark buildings in the US, look to alter global patterns of influence and power. How would other countries react to China's rising international influence?

The US government and many Americans deny their country is an empire, although the US status as the leading superpower makes it an empire in all but name. How will China coexist with the US, which has arguably been an imperialist power since the end of World War II? How will the incumbent neo-imperialist power, the US, deal with an emergent China?

With its acute analysis of Sino-US relations, the book will interest readers who wish to understand the impact of China on various countries, its place on the world stage as well as the geopolitical implications for all in the 21st century.

China watching is anything but being boring because Chinese politics is filled with dramas almost on a daily basis. In the past three years since Xi Jinping became general secretary of the Chinese Communist Party, the Chinese political drama has unfolded with a lot of twists and turns.

Based on a series of articles published on the Diplomat, this volume offers snapshots of different episodes of the political drama from December 2014 to January 2016, focusing mostly on the main character of the show — President Xi Jinping and serving as an appetizer for those who are hungry about Chinese elite politics.

With the rise of China and massive new migrations, China has adjusted its policy towards the Chinese overseas in Southeast Asia and beyond. This book deals with Beijing's policy which has been a response to the external events involving the Chinese overseas as well as the internal needs of China. It appears that a rising China considers the Chinese overseas as a source of socio-political and economic capital and would extend its protection to them whenever this is not in conflict with its core national interest. The impacts on and the responses of the relevant countries, especially those in Southeast Asia, are also examined

3.Islam and politics – Malaysia – Johor

Many scholars on Malaysia have recognized that Salafism-Wahhabism has penetrated substantially into the countrys political and social life.

The southern state of Johor has always been considered, and remains, the bastion of kaum tua, with its religious institutions dominated by ulama (religious scholars) who are traditionalist in character but tolerant of religious practices that are infused with local culture and mysticism. These scholars have also tended to maintain conservative attitudes on gender issues, inter-religious relations, and intra-faith differences.

The Sultan of Johor appoints the Mufti whose primary role is to issue fatwas (religious rulings) and be the ex-officio of the Johor Islamic Religious Council, the highest Islamic body in the state. Johors Muftis are dominantly political quietists, and loyal to the ruling family.

Occasional interventions by the Sultan of Johor in the religious sphere have proved crucial in ensuring that the state maintains its Malay character. The Sultan also acts to protect the states religious institutions from encroachment by the federal government.

In 2015, Singapore celebrated 50 years of independence. The Institute of Policy Studies took stock of how the choices people made have led the city-state to where she is today. As achievements are being celebrated, a conversation about the road ahead also begins. With much nation-building efforts premised upon the existence of this imagined community known as "Singapore", it is an opportune moment to question and reimagine who "we" are.

The book documents the conference proceedings at Singapore Perspectives 2016 where the fourth generation of government ministers presented their thoughts on the social, economic and political future of Singapore and engaged in dialogues with panelists and audience members on the directions the country should take.

Set within the context of growing political pluralism and the increasing use of new communication technologies for social mobilisation, the Institute of Policy Studies organised a national conference on civil society in November 2013. This collection of the essays that were presented at or inspired by the conference provides nuanced analyses of the development of the sector in Singapore since the Institute's first such conference held in 1998. The first section of the book discusses the different philosophies and approaches that underpin how civic activists engage with the State; the second section examines some key forces of change that are re-shaping the sector; and, the third section sets out some emerging issues facing it. Combining insights from experts and civic activists themselves, this book proposes an agenda for the future development of the civil society in Singapore.

South Korea in the United Nations : Global Governance, Inter-Korean Relations and Peace Building / Gabriel Jonsson

World Scientific Publishing Co. Pte. Ltd., Singapore 2017

300p.

9781786341907

\$ 100.00 / HB

In 1991 South Korea, along with North Korea, was made an official member of the UN. Using international relations theory, this book begins by looking at the struggle and eventual impact of the membership on the two countries post division in 1948. It investigates the predicted outcomes prior to joining, and whether these outcomes have come to fruition nationally and on a global scale. Following this, there is focus on South Korea's ability to exert an influence on international decision making in world-politics, and how this affected inter-Korean relations. Importantly, analysis looks at how participation in the Security Council (1996–1997 and 2013–2014) further extended the country's capabilities to adopt resolutions, including those affecting North Korea's missile and nuclear programmes and human rights record. South Korea's participation in peacekeeping operations, Koreans appointed to high positions within the UN system and payments of the UN budget are also investigated. The study concludes with discussion of the role of the UN as a forum for international contacts and for providing knowledge otherwise unavailable to non-members.

South Korea in the United Nations is unique in its analysis of South Korea's relations with the UN prior to and, above all, after 1991, thereby enhancing understanding of the significance of its UN membership as well as the importance of being a UN member. Suitable for scholars in Korean studies, international relations and East Asian politics, it can also be used as a reference work by policy-makers in the region, and for students and professionals working within the UN system.
