Lexis Nexis, Malaysia 2017

9789674006815

\$ 190.00 / HB

This book provides an extensive and in-depth analysis of each component area in copyright law. In each of the areas, the provisions of the Copyright Act 1987 are clearly examined and explained by reference to local case law, where available, and where local cases are lacking, by reference to case law from other jurisdictions. This fourth edition provides an up-to-date analytical commentary of legislative and judicial developments in Malaysian copyright law. In particular, the changes brought about by the Copyright (Amendment) Act 2012 are discussed in detail and, at the same time, judicial decisions expounding on the provisions of the Copyright Act 1987 since the publication of the previous edition are analysed. In some parts, this entailed re-evaluation of existing commentaries and consequent revision to the relevant parts. As a result of the impact of modern computing technology on copyright law, this fourth edition incorporates a separate chapter on Copyright and the Internet, particularly since the jurisprudence in this area of the law is at a fledgling state in this country.

The essays in this volume highlight the movement of Buddhist ideas and practices across Asia and how the encounter of far-flung cultures and personalities encouraged adaptation and transformation. At times this meant textual translation and transmission, as seen in the chapters about Chinese and Japanese Buddhist texts and their authors, or the analysis of Buddhist manuscripts in northern Thailand. Other cases entailed cultural translation—local adaptations of jataka tales, the evolution of legal notions within the framework of Theravada Buddhist teachings, localizations embedded in material culture seen through inscriptions and archaeological traces. Some themes go beyond Buddhism writ small to explore the broad canvas of engagement: the East-West encounter in the British geographical and anthropological exploration of Burma, and the place of Brahmanism in early Buddhist thought as expressed through the jatakas.

This expertly curated selection of scholarship shows that the diffusion of ideas and religious thought is much more than a tale of decline and loss or cultural appropriation and impoverishment. The fresh perspectives presented here—all drawn on primary sources—give an overall impression of a singular diversity that somehow participates in an unacknowledged unity. Beyond the fragmentations of sectarian and cultural divides, disparate Buddhist and non-Buddhist traditions have gone beyond arbitrary boundaries and flourished through their simultaneity.
