Key Indicators for Asia and the Pacific 2017, the 48th edition of this series, includes the latest available economic, financial, social, and environmental indicators for the 48 regional members of ADB. It presents the latest key statistics on development issues concerning the economies of Asia and the Pacific to a wide audience, including policy makers, development practitioners, government officials, researchers, students, and the general public. A key component of the 2017 report is a summary of findings from three pilot household surveys to support the development of standardized methods and guidelines for collecting sex-disaggregated data on asset ownership.
