Shore to Shore : Wildlife and Landscapes of Solomon Islands / Patrick Pikacha
Melanesian Geo, Solomon Island 2018

266p.
9789829802156
\$ 195.00 / HB
1340 gm.

Solomon Islands is one of the largest archipelagos in the South Pacific. Its location between the Bismarck Archipelago in Papua New Guinea to the west, and Vanuatu to the southeast makes it the recipient of remarkable biodiversity overflow from New Guinea and its large satellite islands. Composed of low lying atolls and large and high forested islands, the landscape is stunning. These islands support a diverse range of communities and habitats. This book is a celebration of these landscapes and wildlife.

Lord, Here Comes The Flood : Investigating the Chains of Climate Change
Discourses in Kiribati / Lasse Kolbjorn Anke Hansen

USP Press, Fiji 2014
120p. ; 25cm.
9789820109155
\$ 32.00 / null
280 gm.

Master's thesis Spring 2012, Department of Comparative Politics, University of Bergen

The author builds a theoretical and analytical framework from literature on accountability and responsiveness, I separate between four dimensions of discourses on climate change: the electoral channel, the state actor interactions, non-electoral citizen participation, and finally, the non-domestic interactions. This is supplemented by previous research on small and island states, cultural and historical aspects related to politics in the Pacific, as well as studies on domestic climate change policy formation.

The 2016 Fiji Ant-Mealybug Bioinvasion : Threat to Food, Health, Livelihood,
Cultural and Environment Security in the Pacific Island / R.R. Thaman

The University of the South Pacific (USP) Press, Fiji 2018
130p. ; 30cm.
9789820109759
\$ 75.00 / null
400 gm.

This publication is about the 2016 Fiji Ant-Mealybug Bioinvasion of Fijis islands, cities, villages, homes and gardens by "new" invasive alien ants and the mealybugs, scale insects and other sap-sucking insects that are tended by the ants. As we go about our daily business to promote "sustainable" development, address climate change and promote conservation, a silent multi-front invasion threatens health, livelihood, cultural and environmental security in Fiji.
