Unknown, Volume 1. No. 1 : CIA – Lagos of 1999 / NA
A3:Archives of African Architecture, Nigeria 2020
1v.

\$ 75.00 / null
200 gm.

Unknown is an annual publication by A3: Archives of African Architectures. It is aimed at supporting A3's mission to document Africa's built heritage by unearthing relatively unknown, un(der)documented architects, buildings, details, movements and practices. The inaugural edition will spotlight The CIA-Lagos of 1999: a movement of architects and other creatives principally driven by the architect, Koku Konu

Indian Railway Buildings:: Heritage, History and Beyond / Vinoo N. Mathur
Niyogi Books, New Delhi 2022
356p.; ill. maps. 25 cm.
Includes Index.

9789391125004
\$ 62.50 / HB
1550 gm.

'This is a treasure trove of architecture and art, a story of styles from the classical revival to twentieth minimalism, the history of the Raj's finest buildings like Bombay VT and its most spectacular engineering, the hill railways, (both UNESCO World Heritage sites). It's a thoroughly researched study of a subject little studied, essential reading for scholars, students of the Raj, railway lovers, and indeed anyone who likes good stories.'

Bamboo Ark 1: Exemplary Bamboo Building / Ewe Jin Low & Sandy Chew (Eds)
Dr. Tan Loke Mun & Sandy Chew
Atelier International, Subang Jaya, Selangor, Malaysia 2022

280p.
Includes Index
9789671636152
\$ 90.00 / HB
1758 gm.

Bamboo Ark brings together a collection of contemporary bamboo buildings from across the world. These buildings have been selected to showcase their particular design based on location, built form and structure. Bamboo is a re-emerging material and there are limited design and technical books for bamboo when we compare it to other established materials such as timber, steel and concrete. Delivered from the perspective of an architect who has immersed, designed, built and lived in bamboo buildings, this book provides a how-to reference on bamboo architecture to further promote the use of bamboo in design and construction.

Small Medium Houses 8 / Suluck Visavapattamawon and Rebecca Vickers

Li-Zenn Publishing Limited, Bangkok, Thailand 2021

304p.

9786164590458

\$ 90.00 / null

1200 gm.

Volume 8 displays the considerable and varied talents of the contributing architects. Some have provided novel solutions. Many have introduced new ways of living. The selection of materials and design details by successive generations of designers, as highlighted in this series, are an invaluable source of knowledge and creative inspiration to our readers, whether they be design professionals or homeowners. Although this book was published during the global Covid pandemic, it is a culmination of over two years work. We plan that our next volume will showcase the designs which were conceived during these unprecedented times. It will be interesting to see the changes and design solutions that emerge.

Small Medium Houses 7 / Suluck Visavapattamawon and Rebecca Vickers

Li-Zenn Publishing Limited, Bangkok, Thailand 2020

280p.

9786164590298

\$ 90.00 / null

1100 gm.

Small Medium Houses 7 is a compilation of 33 remarkable projects, most of which are based on the common principles of simplicity and functionality. All modern houses selected to be featured in this volume contain numerous interesting ideas and solutions. All of these have been achieved with the intention that the subtlety and peacefulness are maintained and the complexity needs to be avoided in order to offer a proper residential sense for the occupants.

Thailand Architecture in Steel 09 / Suluck Visavapattamawon and Vilasinee Nitisopon

Li-Zenn Publishing Limited, Bangkok, Thailand 2022

344p.

9786164590489

\$ 100.00 / HB

2050 gm.

ARCHITECTURE IN STEEL VOL.9 Thailand Architecture in Steel Series is proof of the flourishing construction industry in Thailand, which is apparent in the range of large steel construction projects such as malls, skyscrapers, office buildings and private residences. As steel structures reduce construction time, contractors are becoming more adept at working with steel, and there is continued support from steel producers. In this new publication, there are 33 prominent design projects from 23 architectural firms. These projects are considered outstanding examples of the use of steel.

\$ 100.00 / HB

1700 gm.

Thai architecture has witnessed a dynamic and increasing trend towards using steel as part of building and interior design. Architects, engineers, interior designers, builders and furniture makers are now using steel as a primary building material, with confidence and efficiency. ARCHITECTURE IN STEEL 8 compiles more than 33 projects of various from 30 architectural and interior firms that make use of steel for different purposes. Thus, diverse designs of architecture have been created in 2019 every building type, from the mega project Bang Sue Grand Station to private house is covered and each project is illustrated with color photographic line drawing a descriptive text and detail drawing.
